

ANISH KRISHNAKANT AYARE

(551) 260-8994 — anishayare421@gmail.com — USA — LinkedIn — GitHub

SUMMARY

Java Developer with 3+ years of experience in designing and delivering scalable, secure web applications for enterprise and financial environments. Possesses strong expertise in Java (8/11/17), Spring Boot, RESTful APIs, and cloud-native architectures, supporting high-volume, business-critical platforms. Proficient in integrating AI-driven capabilities, automated testing, and robust DevOps pipelines to enhance system reliability, accelerate delivery, and drive data-driven decision-making.

SKILLS

Programming Languages: Java (8/11/17), Python, SQL, JavaScript (ES6+), TypeScript

Frontend Technologies: React.js, Redux, Angular, Material UI, Bootstrap, Responsive Design

Backend & API Development: Spring Boot, Spring MVC, Spring Security, REST APIs, Microservices, JWT, OAuth 2.0

Databases & Data Management: PostgreSQL, MySQL, MongoDB, Hibernate/JPA

Cloud & DevOps: AWS (EC2, EKS, S3, Lambda), Docker, Kubernetes, Jenkins, CI/CD, Git

Testing & Quality Engineering: JUnit, Mockito, Jest, API Testing Tools

AI & Advanced Analytics: AI-driven Risk Scoring, Document Intelligence Services

Security & Compliance: Spring Security, API Security, RBAC, OAuth 2.0, JWT

Development Practices & Tools: Agile/Scrum, CI/CD, Logging & Monitoring

EXPERIENCE

Java Full Stack Developer

Freddie Mac, USA

Jan 2025 - Present

- Architected and delivered Java 17 Spring Boot-based microservices, supporting mission-critical mortgage workflows and handling 30K+ loan events per day with consistent performance and regulatory reliability.
- Implemented secure, cloud-native REST APIs using Spring Security, OAuth 2.0, and JWT, strengthening data protection and reducing authentication-related production issues by 25% across distributed systems.
- Deployed containerized Java applications on AWS (EKS, EC2, S3) using Docker, Kubernetes, and CI/CD pipelines, accelerating release cycles by 35% and improving environment consistency.
- Integrated AI-driven risk scoring and document intelligence services into Java applications, enabling automated loan document analysis and reducing manual underwriting review effort by 30–40% while maintaining auditability.
- Built and maintained automated testing pipelines using JUnit, Mockito, and API testing tools, achieving 80%+ test coverage and improving release stability by lowering post-deployment defects by 20%.

Software Developer Intern

Shoptaki, USA

Jun 2024 - Sep 2024

- Developed scalable full-stack web features, including RESTful APIs and backend services, for a high-traffic e-commerce platform serving 100K+ active users.
- Implemented efficient data access, validation, and error handling within backend services, enhancing application reliability and response times.
- Designed responsive and reusable UI components, improving user experience and code maintainability.
- Contributed to an Agile/Scrum team, translating requirements into production-ready features and participating in code reviews and debugging to ensure quality releases.

Software Developer

Hexaware Technologies, India

Aug 2021 - Jul 2023

- Engineered cloud-ready Java Spring Boot microservices for large-scale enterprise platforms, supporting 50K+ monthly transactions with high availability and fault tolerance on AWS-hosted environments.
- Designed and consumed RESTful APIs with secure authentication (OAuth 2.0, JWT), enabling seamless integration and reducing service response times by 20–25% through backend optimization and caching strategies.
- Developed responsive front-end modules with modern state management, improving page load performance and enhancing user productivity by 30%.
- Implemented automated testing frameworks including JUnit and Mockito, increasing unit and integration test coverage to 75%+ and significantly reducing production defects during release cycles.
- Containerized applications using Docker and supported deployments via CI/CD pipelines (Jenkins, Git), enabling faster releases and reducing manual deployment effort by 40% across development and QA environments.
- Collaborated with QA, DevOps, and business stakeholders in Agile delivery models, leveraging cloud monitoring, logging, and debugging tools to ensure performance stability, compliance readiness, and reliable production rollouts.

EDUCATION

Master's in Computer Science

Pace University, NY, USA

Sep 2023 - May 2025

Bachelor's in Computer Science

University of Mumbai, Mumbai, India

Aug 2020 - May 2023
